Footnotes (some of these info can be found in our eTwinning Twinspace too):

1.

a. a poster with the following items: the name of the school, the city, the first names of the pupils, the name of the teachers + pics of the team (we'll hang the posters for all our school community);

b. a photo (printed) chosen among the ones taken by each team's pupils for our RSS project (which hints at our project's topic: time)

c. a video (on a memory stick) chosen among the ones made by each team's pupils for our project. The common theme for the video has to be quite general but in connection with some of the time points gone through so far (Physical time from 3 perspectives, Social time from 3 perspectives, Creative corner). Max. length 3'. In case of the use of soundtrack and/or images covered by copyright, the sources have to be properly mentioned. All the underage people shown must have parental permission to the use of images. You can choose the language: either in English or in French, German, Italian, Polish, Spanish with English subtitles.

The photo and the video will take part in a small competition. They will be viewed and voted by a class which does not take part in the Comenius, according to the following criteria: a) coherence with the theme of the project, b) originality, c) image quality; d) compliance with the given directions.

The winner teams will be announced a couple of days later.

2.

on Feb. 11, in the afternoon, the pupils of each team might introduce themselves (allotted time about 20') through the work done in the TS, without extra ppts or prezis or videos (unless they refer to the work done in the TS).

3.

The teachers' meeting will also consider 'TIME' in connection with our teaching reality - our jobs, how to run project work efficiently beside school or as an integrated part of school teaching, so that we have a 'short' discussion and turn the project also into a teacher exchange (possible topics: interaction - common products - wiki pages - evaluation of the project so far)

4.

in the afternoon we'll ask pupils - divided in international groups - to choose some pics from the ones they will have taken in the morning to be uploaded on the Twinspace (bring in what might be needed:

Scuola superiore statale in Roma

cameras, smartphones, wires); after that pupils will have a meeting where they will discuss such topics as: how to improve interaction among teams, how to implement the further steps of the project, etc. (each team will have a pupil in charge of the minutes of the meeting, the 5 reports will be published in the TS)

5.

on Febr. 13th, in the evening, we will have a "**Time party**" at school, please wear or have an item which reminds of the theme of the party
