

# The Week from Wednesday to Saturday

Wednesday:

On Wednesday we met at the Lycée again, where we went to the bus station to go to an underground. With it we went to a very beautiful big mosque. There was a man who told us about the history about the mosque and what they do there. After this we ate there our food which we got from our host families. Then the Spanish Team got notes with names from each team so we formed international teams with one person each from France, Italian, Polish, Spain and Germany. In the afternoon we went to the bus station again to go to the Musée des Beaux Arts de Lyon which I found very beautiful and interesting, because there were a lot of big paintings and statues/sculptures I've never seen before. We went together in our teams and got questions on notes which we had to answer.

Thursday:

On Thursday we met at the Lycée to go to the bus station again where we went to the wonderful Cathedral which we had seen from the sea. We went to a viewing platform where we had the view of whole Lyon. Then we went into the Cathedral which was more beautiful inside than outside. There were a lot of colourful windows of mosaics. Then we went out of the Cathedral and one of the French teachers showed us the old side of Lyon which has small roads with small alleys. After this trip we went to the Museum Gadagne where we sat behind the Museum on stairs. Then we had a big break where we could explore the stores in the streets. After the break we visited the Museum Gadagne.

Friday:

First on Friday we met at the Lycée where we held our presentations. After this we went together in our international groups which were two groups together. Our group worked at a Calender which was made with our ideas and consisted of the Christian Calendar, the Islamic Calendar and the Jewish Calender. Then we presented what we had done and showed the other groups about our Calendar/s and they showed us the result of their work. Then we buried the Time capsules in the school garden where all of us put some things into them which had to do something with time. After all of this we had a good lunch in the cafeteria. In the afternoon we had a lot of freetime where we talked a lot and had a lot of fun. In the evening we went to a big park where all teams went all together without teachers. Some of us danced to music, the others talked together. But we had a lot of fun!

Saturday:

Saturday was the time where we said goodbye to Lyon and the other teams. We went to the train where we had to go to the airport to fly back home to Marl. For me it was an exciting trip in another country and to get to know other nationalities with all different cultures we could think about. All in all it was the greatest trip with school I've ever had and I always could do this again!
